ActorName → Phone, Address, AgentName

[SPTitle, Author, SceneNumber, TakeNumber | Date, Time]
SPTitle, Author, SceneNumber, TakeNumber → Date, Time

[ActorName, SceneNumber | StoryLocation, FilmLocation]
ActorName, SceneNumber, TakeNumber → Date, Time

[ActorName, SceneNumber, TakeNumber | Date, Time]
SPTitle, Author, SceneNumber, TakeNumber → Date, Time

2.1)
Code → title, publisher, date
SongID → title, composer
UserID → password, name, emailAddress
SongID, Code → length, page
UserID, Code → pdfFileName, PageOffset

2.2)
Code → title, publisher, date
SongID → title, composer
UserID → password, name, emailAddress
SongID, Code → length, page
UserID, Code → pdfFileName, PageOffset

2.3)
[Code | title,publisher,date]
Code → title, publisher, date

[SongID | title,composer]
SongID → title, composer

[UserID | password,name,emailAddress,title]
UserID → password, name, emailAddress

[SongID,Code | length,page]
SongID, Code → length, page

[UserID,Code | pdfFileName,PageOffset]
UserID, Code → pdfFileName, PageOffset

3.1)
Stdnum,name,strnum,street,postcode,area_code,office_code,station_code,email
email→ student
area_code,office_code→ city
postcode→ city
course_num→ department_name
period,room_num→ building
stdnum,course_num,course_section→ grade

3.2)
stdnum→name,street,postcode,area_code,office_code,station_code,email
email→student

area_code,office_code→city
postcode→city
course_num→department_name
period,room_number,term→course_section
room_num→building
stdnum,course_num,course_section→grade

3.3)
[stdnum | name,street,postcode,area_code,office_code,station_code,email]
stdnum → name,street,postcode,area_code,office_code,station_code,email
[email | student]
email → student
[area_code,office_code | city]
area_code,office_code → city
[postcode | city]
postcode→ city
[course_num | department_name]
course_num → department_name
[period,room_number,term | course_section]
period,room_number,term → course_section
[room_num | building]
room_num → building
[stdnum,course_num,course_section | grade]
stdnum,course_num,course_section → grade
[stdnum,course_num,period,room_number,term,room_num |]
